

## Harmonized Evaluation, Certification and Testing of Security Products

Coordinator: FOI

## HECTOS at a glance

HECTOS is a project under the EU's seventh framework (FP7)
September 2014 – August 2017 (3 years)
Total: 287 PM, 3.5 M€

Support harmonisation of the European market by producing elements for a roadmap for the development of Harmonized Evaluation & Certification (E&C) schemes for Physical Security Products

Goal:

# **HECTOS Background and Objectives**

#### Current problem

- Physical security products are diverse in technologies, application areas, performance etc., which makes it difficult to compare them for manufacturers and users
- Evaluation & Certification procedures often lack applicability and recognition between Member States

### **HECTOS Objective:**

• Harmonisation of E&C schemes for physical security products

#### To lead to:

- Enhanced recognition and trust of E&C
- More homogeneous and wider market
- Enhanced possibility for users to compare performance
- Enhanced possibility for suppliers to demonstrate performance

# HECTOS will work on the objectives through:

# Focus on Physical security products

## Protection of (mainly) physical assets from physical attack

- Includes cyber attack on physical security product
- Not cyber attack on IT systems

## Products (HW & SW) used in provision of physical security

• The pressure of global competition will target manufacturing of products and technologies rather than services

### Focus on protection from serious crime & terrorism

• Not safety, not natural disasters

## Case studies

HECTOS will validate the template for harmonised E&C Scheme by applying it when developing schemes in two case studies:

- Biometrics
- Weapons and Explosives detection (Non-AVSEC applications)

### Case studies represent areas with:

- complex E&C requirements
- different types of requirements, applications, regulations, ...
- high priority in the SIP
- a lot still to be developed in terms of E&C

# **Evaluation & Certification Schemes**

#### **High level Certification scheme template**

Requirements

Certification

Accreditation

#### Ideas for detailed Certification scheme template

#### Requirements

- Technical, evaluation requirements
- Requirements connected to application or product category

•

#### Accreditation

- Regulation 765/2008
- Accredited bodies

•

#### Certification

- Type of evaluation/ certification
- Applicability of self-testing
- Request and allocation procedures
- Test method
- Availability
- Repeatability
- Ownership
- Publicity

• ...

# Path towards Harmonisation Roadmap

**Interaction with Stakeholders** 

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 606861.

HECTOS is a collaboration between:
